<sup>a</sup> Hydrologic conditions refer to lake levels in feet above sea level.

<sup>b</sup> Hydrologic conditions refer to lower Rush Creek streamflow in cubic feet per second.

<sup>c</sup> Hydrologic conditions refer to streamflow in cubic feet per second.

<sup>d</sup> Near term refers to the 20-year projection period beginning in 1989.

<sup>e</sup> Long term refers to the projection period beginning after Mono Lake achieves its target level.

<sup>f</sup> Drought refers to a drought event with a 100-year recurrence interval.
